

Neurotranq 10 mg

Composition:

Each tablet contains:
10 mg acepromazine (as maleate)

Action:

Acepromazine is a derivative of Phenothiazine and is a very powerful tranquilizer and neuroleptic.

It possesses anti-emetic, anti-convulsant, hypothermic, hypotensive, anti-spasmodic and analgesic properties.

Indications:

Tranquillization, conditions of fear; examination and anaesthetic pre-medication; travel sickness.

Administration/dosage:

Orally: 1-2 mg acepromazine per kg body weight (twice daily); duration of the medication is dependent of the indication.

Contra-Indications:

Hypotension; hypothermia; anaemia.

Conservation:

At room temperature (15-25°C) and protected from light.
