

Ascaten

Composition:

Each tablet contains:
450 mg niclosamide
50 mg oxybendazole.

Action:

Antiparasitic combination active against cestodes and nematodes. Niclosamide is a specific anthelmintic against cestodes, such as *Taenia ovis*, *T. hydatigena*, *T. pisiformis*, *Echinococcus granulosus*, *Dipylidium caninum*. Oxybendazole is a Broad spectrum anthelmintic active against many nematodes, especially in case of mixed infections of nematodes. It is non-toxic. Sensitive are e.g. *Toxocara canis*, *T. leonina*, *Ancylostoma caninum*, *Uncinaria stenocephala* and *Trichuris vulpis*. Ascaten may be used for pregnant animals and are recommended especially for cats and dogs.

Indications:

Mixed infections of nematodes and cestodes, especially in kittens, pups and older animals.

Administration/dosage:

Orally, 1 tablet per 5 kg b.w., preferably on empty stomach. If necessary repeat after one month.

Conservation:

At room temperature (15-25°C), dry, protected from light.

Presentation:

Bottles of 500.
